

BROADBAND CONNECTIVITY

CONSISTENT HIGH PERFORMANCE

Exceeds passengers' and operators' expectations

Collins Aerospace broadband connectivity, powered by Inmarsat's Global Xpress (GX) satellite network, provides the first seamless satellite communications service with greater performance consistency than any aviation global satellite service available today.

This underpins the Collins Aerospace CabinConnect™ service – and for the first time, cabin broadband with seamless handoff is available worldwide. This advanced designed network, specific for fast mobile users, is generations ahead of the complex stitched service networks found with Ku-band service.

We offer you the high reliability of a single operator and network, in addition to the advantage of a more efficient and powerful Ka-band spectrum.

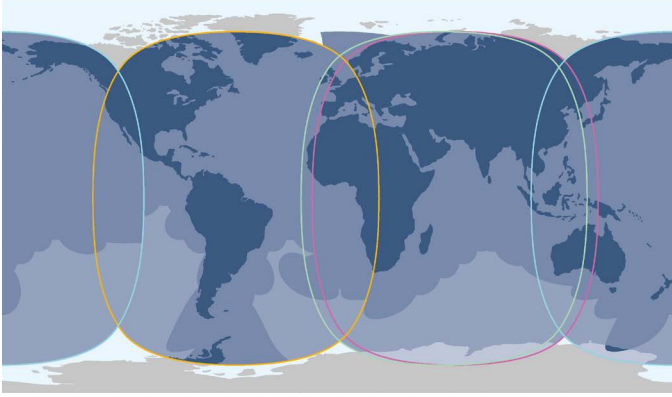

Our global GX Ka-band cabin broadband connectivity service is available today for all aircraft types, whether retrofitted or for OEM line-fit offerability. There are three fuselage-mounting antenna options and even a tail mount antenna that fits many regional jet airframes.

As the demand grows for more broadband connectivity, so does the GX satellite network – to keep pace with your passengers' expectations. We provide a broadband connectivity service that is flexible, scalable and easily upgradeable to meet the needs of airlines today and tomorrow.

KEY FEATURES AND BENEFITS

- True, global coverage with seamless transitions between beams
- The only Ka-band steerable beam design to enhance service performance
- State-of-the-art mobility management
- Dynamic resource allocation
- Optimized and redundant ground network
- Line fit and retrofit options to suit your needs
- Full fleet support for today and the future from a trusted aviation partner

As a consistent top supplier to the OEMs, Collins Aerospace is a trusted partner to deliver great value for your business, tailored to the unique needs of your airline and passengers. We bring the same commitment to delivering an exceptional cabin connectivity experience as we do in everything Collins Aerospace delivers for your aircraft.

Our service capabilities support numerous possibilities to create new ancillary revenue streams and increase operational efficiencies. Our platform supports advertising and sponsorship for related products and services, including hotels, car rentals, tourist attractions and many more. Additionally, our connectivity packages are carefully crafted to suit each individual airline and their customers. If you like the reliability and quality we bring to the flight deck, you will love the connected cabin experience we offer today.

Collins Aerospace is uniquely positioned to bring economical and robust IFEC solutions with our GX broadband connectivity.

APPLICATIONS AND VALUE-ADDED SERVICES SUPPORTED

- High-speed broadband internet access
- Apple, Android™ and Microsoft® software
- Video calling
- Email
- Large file transfers
- VPN access
- VoIP phone service
- On-board IFEC content updates
- Advanced moving maps
- Advertising platform and sponsorship module
- Non-safety flight deck application support
- Cabin crew applications
- Optimized portal and content management software
- 360 feedback software for real-time analysis
- Aircraft Health & Maintenance (AHM) dashboard

PRODUCT SUPPORT

- 24/7 global technical support and customer service
- Service offices in more than 150 of the largest airports in the world
