

ARINCDirect<sup>SM</sup> cabin solutions

# TAKE YOUR BUSINESS TO ANY ALTITUDE

Keep your passengers connected  
at every flight level

**Collins Aerospace**

# STAY CONNECTED EVEN AT 40,000 FEET

## **BROADBAND SOLUTIONS**

Today's business jet travelers are looking for the fastest cabin connectivity available. Live streaming, teleconferencing, VPN, VoIP capabilities, internet and email have become standard and even expected. The Collins Aerospace ARINC Direct<sup>SM</sup> portfolio of cabin solutions provides any experience they want. Our expertise in all phases of flight and our outstanding technical support will help you exceed your passengers' expectations.

#### **DISTINCTIVE FEATURES**

- Inmarsat Jet ConneX (JX)
- Inmarsat SwiftBroadband (SBB)
- Viasat Mobile Broadband
- Inmarsat SwiftBroadband 200 (SBB)
- Inmarsat Swift 64

# WE PROTECT YOUR INFORMATION EVERYWHERE IT GOES – AND YOU IN THE PROCESS

## CYBERSECURITY

At Collins Aerospace, cybersecurity isn't just a product, it's the foundation of what we do. Our aviation network moves 20 million messages a day. It's built to constantly analyze and identify normal and suspicious activities. No unrecognizable traffic goes into an aircraft with ARINC Direct connectivity without permission. Here is how we keep your data secure:

- Monitoring your data flow and touch points 24/7/365
- Understanding all of the traffic crossing our network, including applications, users and devices
- Blocking access to your IP address and replacing it with ours
- Using the most secure network available in aviation today – the same used by commercial airlines for credit card information

# HELPING YOU USE YOUR PHONE JUST AS YOU WOULD ON THE GROUND

## VOICE SOLUTIONS

Whether it's business or pleasure, sometimes nothing can replace picking up the phone and speaking to someone. Collins' ARINCDirect provides a variety of voice services so your passengers can make and receive important calls just like they would on the ground, allowing them to easily stay connected to their business, family and friends while in flight.

## DISTINCTIVE FEATURES

- Inmarsat Classic Aero
- Iridium®
- Iridium Certus

## Trusted support

As an ARINCDirect customer, you'll have high-reliability, global coverage with 24/7/365 technical support. Plus, the upgrade consultation, on-site diagnostics and configuration, network engineering and ongoing aircraft support to keep you connected.

# THE TOOLS TO MAXIMIZE YOUR CABIN EXPERIENCE

## CABIN SOLUTION ENHANCEMENTS

Regardless of what your passengers are looking to do, Collins' ARINCDirect cabin solutions provide the foundation for a passenger experience that allows them to relax or work in any location, at any flight level. Making that experience even more useful are the applications for you to track, troubleshoot and manage the connectivity and data on the aircraft. By choosing any of the ARINCDirect cabin service enhancements, you and your passengers have the tools you need to always keep your service running seamlessly.

### ARINCDIRECT DASHBOARD

Accessible from your mobile device or desktop, the ARINCDirect dashboard keeps you updated about information such as your cabin data usage and aircraft status no matter where you are, at your desk or on the go.

### USAGE DETAILS

Whether it's voice calls, Inmarsat Swift 64, SwiftBroadband or Jet ConneX, the ARINCDirect usage details allow you to view your cabin information in a variety of formats.

### COVERAGE OVERLAY MAPS

Pilots can overlay up to five different coverage maps on their route to determine if they are flying out of satellite coverage. This ensures seamless connectivity for your passengers.

### CONTENT FILTERING

Our next-generation content filtering, allowing you and your flight department to control costs by determining the type of content that can be accessed using your onboard internet.

### ARINCDIRECT GROUND CONNECT

Passengers and pilots can utilize cost-effective 3G/4G/LTE cellular connectivity while the aircraft is on the ground without throttling or network roaming.

### CABIN USAGE APP

The ARINCDirect cabin usage application provides a detailed view of just how your cabin data is being utilized.

### NETWORK ANALYZER APP

Easy-to-use network troubleshooting tools to check connectivity prior to a flight and help restore connectivity in flight in the event of an outage.

### ADCONNECT VOIP APP

It allows passengers to call anywhere in the world directly from their smartphone.

### ARINCDIRECT DIAL

Ground-to-air telephone service provides a single aircraft or your entire fleet with a standard local phone number for routing calls to any handset in the aircraft.

### AIRBORNE DATA ROUTER

Designed with the highest aviation standards to meet the aircraft's connectivity routing requirements. Tools within the ADR will allow business operators to save time and money, while improving the overall passenger and crew experience.
