

ARINCDIRECTSM DASHBOARD

ALL YOUR OPERATIONAL DATA AT A GLANCE

A customizable view on your preferred device

To manage your operations and data efficiently, you need the right information at the right time. That's what you can expect from the Collins Aerospace ARINCDirectSM dashboard. Accessible from your mobile device, tablet or desktop, the ARINCDirect dashboard keeps you updated about operational information – from the flight deck to the cabin – no matter where you are, at your desk or on the go.

EASILY CUSTOMIZABLE

The simple to use and highly customizable ARINCDirect dashboard allows you to create your own perfectly tailored operations environment. Adjust the size and placement of tools. Choose the information that you want to see and remove what you don't. And because of our web-responsive design, you can access your personalized dashboard using your smartphone.

AUTOMATIC ALERTS

The ARINCDirect dashboard allows you to set up notifications, alerting you only when needed. Whether you want to be alerted when a specific amount of cabin data has been used or when your aircraft departure is delayed – you can do that and more. Notifications are easy to create and are user specific, so you can implement as many or as few as you like.

ONE CLICK AWAY FROM MORE DETAILS

When you click the details icon, the dashboard effortlessly launches other pages within the ARINCDirect solution. You can readily connect to our FlightAware service for more in-depth tracking information. A single click is all you need for a deeper dive into your cabin data usage and much more.

KEY FEATURES

- Monitor your entire operation in one dashboard
- Create user-specific alerts
- Mobile, tablet and desktop compatible
- Customizable user environments
- Easily drill down and explore detailed information
- Comprehensive information at a glance
