**ORDERING PROCEDURE**

Orders for exchange or rental units can be placed directly with Collins Aerospace Avionics or through your choice of Collins Aerospace Avionic dealers. When placing an order, the following information will be requested:

Registered Aircraft Owner's Name	Type of Service desired (Rental or Exchange)
Aircraft Type/Platform	Purchase Order Number
Aircraft Serial Number	Equipment Type
Aircraft Registration Number	Part Number
Warranty Information, if applicable	Serial Number of Defective Unit*
Billing Address	Reported Complaint of Defective Unit
Shipping Address	Preferred Shipping Method & Account #
Name and Address of the End User (Also known as Ultimate Consignee) (REQUIRED)	Software Part Number (if applicable, SW# must be provided by customer)
Valid End User Certificate on file for shipments with final destination in China, Russia or Venezuela (certificate required to be updated yearly)	Any Special Requirements/Instructions

\* In order for warranty or contract (CASP) coverage to be confirmed, the serial number of the failed unit must be provided at the time of order processing.

**POOL LOCATIONS AND CONTACT INFORMATION**

Courier Shipments – All locations, as arranged	

**It shall be the customer's ultimate responsibility, prior to installation, to ensure that any unit received from Collins Aerospace Avionics complies with applicable requirements under which the aircraft is licensed and operated.**

### **GENERAL TERMS AND CONDITIONS**

Exchange and Rental Services are available as warranty consideration (where applicable) or at the prices contained in this publication. Exchanges are limited to part numbers included in this publication and are available on a first come, first served basis. Items identified as N/A in the respective pricing column of this publication are not available for rental/exchange.

Prices are exclusive of any federal, state or local sales tax and excise or end use taxes. Prices are subject to change without notice. The Customer is responsible for any customs charges, import duties, brokerage fees or other related international shipping charges. Collins Aerospace Avionics will not reimburse for labor hours to remove and replace a faulty unit for transactions outside of warranty. The rental/exchange unit will be certified in accordance with CFR Title 14, Parts 43 and 145; EASA Implementation Rule Part 145 (EASA accepted repair stations) or in accordance with certifications held from other aviation authority and will be tagged either "inspected," "modified," "overhauled," or "repaired." The Rental-Exchange Pool does not guarantee any parts in new condition.

An exchange unit becomes the Customer's property; the faulty exchange core returned becomes the property of Collins Aerospace Avionics. There is no change of ownership with a rental unit. The same unit is returned to Collins Aerospace Avionics at the end of the rental period.

Requests to exchange cores of the same equipment type, but with a different Collins Aerospace Avionics part number, will be considered at the sole discretion of Collins Aerospace Avionics. Prior approval is required from the Rental-Exchange Pool. Different part number exchanges shall be subject to additional charges that will vary dependent on core return and condition.

Collins Aerospace Avionics cannot accept any dissimilar exchange requests on any Options Control Modules (OCMs).

Availability of all units is subject to change. Collins Aerospace Avionics reserves the right to make pricing adjustments or corrections as necessary.

## **EXCHANGE/RENTAL SHIPPING PROCEDURES**

Standard Shipments for In-Warranty Customers - Collins Aerospace Avionics offers free of charge standard shipping through our preferred carrier, Federal Express, for all in-warranty transactions. Charges other than shipping, such as brokerage fees, customs charges, import duties, etc. are not paid by Collins Aerospace Avionics. If FedEx Overnight Early AM delivery or similar service is requested, a fee of \$200.00 USD per shipment will apply.

If an alternate carrier is requested, a Carrier account number must be provided. In lieu of a carrier account to bill, Collins Aerospace Avionics will charge an additional \$200 to cover those shipping costs. Customers using their own shipping account are responsible for any delays encountered by the customer's selection of carrier and/or customs issues.

Standard Shipments for Out-of-Warranty Customers – A carrier account number will be requested for shipping of billable exchange transactions. Collins Aerospace Avionics will not pay any fees related to brokerage, customs charges, import duties, or any other international charges. Collins Aerospace Avionics cannot accept responsibility for any delays encountered by the customer's selection of carrier and/or customs issues.

Courier Service – If a customer wishes to expedite shipment via use of a courier, there are two options available:

1. The buyer may select and coordinate the use of a courier service. Collins Aerospace Avionics will provide notification once the shipment is available for pickup, buyer will contact courier service and arrange pickup time.
2. Collins Aerospace can arrange courier service or “counter- to-counter” shipment. For shipments within the US, the fee for this service is \$500 USD per shipment, which includes the freight charge. For shipments to non-US locations, buyer will be invoiced all shipping fees. The shipping and tracking details will be provided to the buyer once the unit is picked up. Collins Aerospace Avionics will not pay customs, taxes, and duty fees for the shipment; therefore, the buyer must provide a customs broker and VAT Registration number.

## **EXCHANGE BILLING PROCEDURES**

Exchange pricing is conditioned upon the receipt by Collins Aerospace Avionics of an acceptable core unit within the established transaction period. To be considered “Acceptable” the core unit must have a valid Collins Aerospace Avionics nameplate and be in repairable condition.

Collins Aerospace Avionics cannot accept units received without a nameplate, with an altered nameplate or with a suspected counterfeit nameplate or suspected counterfeit internal assemblies. Any units received with these conditions will be returned to the sender.

If the core received requires installation of chargeable service bulletins to bring the core up to the same quality and functionality of the exchange unit provided, Collins Aerospace Avionics reserves the right to bill the Customer for the installation of those bulletins or reject the core.

The transaction period will not be closed until an acceptable core is received.

Billing discrepancies must be reported within 90 days of invoice date. If any delay in returning the core is anticipated, please contact Rental Exchange Administration.

## **RENTAL BILLING PROCEDURES**

The minimum rental fee is for a period of 30 calendar days from the date the unit is shipped by Collins Aerospace Avionics. Rental prices are conditioned upon Collins Aerospace Avionics receipt of the same serial number unit in return, within the established transaction period. The Collins Aerospace Avionics nameplate must be in place and intact and the unit must be in repairable condition.

Collins Aerospace Avionics reserves the right to charge for returning units to a serviceable condition if they have been subjected to contamination damage, abnormal wear, improper packaging or unauthorized repairs.

Collins Aerospace Avionics reserves the right to charge the current catalog list price of a returned rental unit that has been damaged by lightning, fire, submersion, crash, or is otherwise deemed beyond economical repair.

Billing discrepancies must be reported within 90 days of invoice date. If any delay in returning the unit is anticipated, please contact Rental Exchange Administration.

## **HIGH PRICE REPAIR TO EXCHANGE POLICY**

If a customer has received a repair estimate from a Collins Aerospace Avionics Service Center that exceeds the rental exchange catalog price and decides to proceed with an exchange in lieu of the repair, Collins Aerospace Avionics reserves the right to charge 1.5 times the catalog exchange price or the repair estimate, whichever is higher. This policy applies to the conversion of a rental transaction to an exchange transaction, if the customer has a rental unit and decides to keep it, rather than complete an in-house repair. The rental will be credited 100%, and the charge becomes 1.5 times the exchange price or the repair estimate, whichever is higher.

For example, if a customer receives an estimate on their repair of \$10,000, and a quote for an exchange of \$8,000 and decides to proceed with the exchange to avoid paying the higher repair price, Collins Aerospace Avionics reserves the right to charge \$12,000 (1.5 times \$8,000) for that exchange to cover the costs for that high price repair.

## **CREDIT CARDS**

Collins Aerospace Avionics is pleased to accept payments made via VISA, MasterCard, or American Express. Authorization can be completed on the phone with the Rental-Exchange Pool Order Administrator. If an order requesting payment by credit card is submitted via e-mail, an e-mail will be sent with a link to provide credit card information in a secure environment. This method protects the security of customers' personal information, in keeping with Pay Card Industry Compliance standards.

## **CORE RETURNS POLICY**

Exchange Return cores must have the same part number as the exchange unit shipped by Collins Aerospace Avionics unless prior approval has been obtained from the Rental-Exchange Pool.

In the case of a Rental transaction, the unit returned to Collins Aerospace Avionics must be the same part number/serial number as the rental unit shipped by Collins Aerospace Avionics.

The Unit Return Data Sheet must be included with each return.

It is the responsibility of the customer to communicate any expected delays to Collins Aerospace Avionics prior to the part return due date.

Units must be returned to the Collins Aerospace Avionics Service Center indicated on the return instructions sheet. Failure to return the core to the instructed location will result in a charge of \$210 to cover the cost of trans-shipping the unit to the correct location.

Extended Use fees are billed per day at 5% of the standard Rental Fee. If a Rental Fee does not exist, 5% of the standard Exchange Fee shall be used.

Extended Use Fees related to the LTN-101-( ) Equipment Types are set by Northrop Grumman Corporation and will be onward billed to the Customer by Collins Aerospace Avionics. An additional administrative fee of \$200 USD will be applied.

Core replacement fees are billed at Current Collins Aerospace Avionics list price for outright sale, plus accumulated Extended Use Fees and Rental / Exchange Fees.

Cores received after a core replacement invoice has been issued shall not be accepted; units will be returned to the shipper.

The following table outlines return receipt windows, which vary according to the region the unit is being returned from (i.e. the customer location).

Shipment Zone	Return Period (Note 2)	First Extended Use Billing Date	Core Replacement Billing Date
From within North America From within Singapore or From within European Union (including Switzerland & Norway) (Note 1)	Exchange: 20 days	Upon core return, or day 81 (60 days overdue), whichever occurs first	Day 111 (90 days overdue)
	Rental: 30 days	Upon rental unit return, or on day 91 (60 days overdue), whichever occurs first	Day 121 (90 days overdue)
	Rental w/ Repair: (Note 3) 10 days after shipment of repaired unit	On the 11 <sup>th</sup> day after shipment of the customer's repaired unit	Day 121 or 45 days after return of customer's repaired unit, whichever occurs last
From Brazil, India, China, Russia, Azerbaijan, or Pakistan	Exchange: 45 days	Upon core return, or on day 106 (60 days overdue), whichever occurs first	Day 136 (90 days overdue)
	Rental: 60 days	Upon rental unit return, or on day 121 (60 days overdue), whichever occurs first	Day 151 (90 days overdue)
	Rental w/ Repair: (Note 3) 20 days after shipment of repaired unit	On the 21 <sup>th</sup> day after shipment of the customer's repaired unit	Day 151 or 45 days after return of customer's repaired unit, whichever occurs last
All other	Exchange: 30 days	Upon core return, or on day 91 (60 days overdue), whichever occurs first	Day 121 (90 days overdue)
	Rental: 45 days	Upon rental unit return, or on day 106 (60 days overdue), whichever occurs first	Day 136 (90 days overdue)
	Rental w/ Repair: (Note 3) 10 days after shipment of repaired unit	On the 21 <sup>th</sup> day after shipment of the customer's repaired unit	Day 151 or 45 days after return of customer's repaired unit, whichever occurs last

**Notes:**

1. European Union member countries as defined by the European Parliament.
2. From date of shipment by Collins Aerospace Avionics. Days are represented as calendar days.
3. An additional grace period may apply if the Customer's unit arrives at a Collins Aerospace Avionics Service Center for repair within 10 days of outgoing shipment of a rental unit by Collins and if the Customer's unit is still in repair at the end of the initial rental period. To be eligible the repair estimate must be approved within 5 days it's of receipt. If the repair unit is received at a service location more than 10 days after the shipment of the rental unit, or if the repair estimate is not approved in a timely manner the additional grace period is reduced to 5 days.

**RETURN INSTRUCTIONS**

A Return Instructions form is included as the last page of the packing list that accompanies the outgoing rental or exchange unit (see sample below). The Return Instructions form includes the address of the service center where the exchange core or rental unit is to be returned as well as important sales order information that will ensure your transaction is closed out successfully. Customer assistance is respectfully requested in completing the key information at the bottom of the return instructions form, as this will aid in accurate troubleshooting and repair.

Please complete and enclose this form with the return core.

The Collins Aerospace Avionics preferred customs broker for International core returns is Federal Express Corporation.

The Rockwell Collins preferred customs broker for International core return is Fed EX. This information should be included on the commercial invoice.

## **RETURN INSTRUCTIONS (CONT'D)**

PLEASE DO NOT INSURE shipments when Collins Aerospace Avionics is responsible for freight. Collins Aerospace Avionics shipping containers are designed to meet or exceed ATA-300 specification Category III for most units. Some parts require special shipping containers, such as AFD-3XXX(), AFD-5XXX(), AFD-6XXX(), and RTA-4XXX.

Hazardous Material - Collins Aerospace Avionics complies with applicable rules and regulations when shipping hazardous materials, including products containing lithium batteries. It is expected that products returned to Collins Aerospace Avionics for repair or exchange will be shipped in accordance with the applicable rules and regulations.

## **EXCHANGE CORE IMPORT REQUIREMENTS**

When a core is being returned to the United States from a location outside the United States, the import invoice must contain the following information:

- Complete description of merchandise
- Collins Aerospace Avionics part number and quantity
- Vendor part number if applicable. Name of manufacturer (if not Collins)
- Commodity classification (USML Category Number or ECCN)
- Unit price and extended amount (U.S. Dollars) — transaction value/Customs value (see ICM-13, Valuation)
- Declared value for Customs purposes only
- Harmonized Tariff Schedule (HTS)
- Country-of-Origin (country where goods were manufactured)
- Invoice number and shipment date
- Total number of cartons, weights and measurements
- Terms of sale
- Shipper and Ship To name and address
- Mode of Transportation - Air, Freight Collect, or Third Party Bill Collins Aerospace Avionics
- Reason for Importation Other Than Sale (US Goods Returned, Repair/Return)
- Name of responsible employee of the exporter who has knowledge of the transaction

Collins Aerospace Avionics is the Importer of Record. All imports must be cleared using our preferred import broker, Federal Express.

## **RETURN OF UNUSED UNITS**

**Prior authorization is required from the Rental-Exchange Pool to return a unit unused.** For unused returns, the Customer is responsible for all return freight charges. These fees include, but are not limited to, freight, customs charges, import duties, or any other international charges whether the unit is in or out of warranty.

A return received within 10 days is charged a restocking fee of \$1,000 USD. If the applicable rental or exchange price is less than \$1,000 USD, the lower price will be charged. The unit returned must be the same that was shipped out (same serial number).

A return received after 10 days is charged a full monthly rental fee. If a rental price is not available, the charge will be 80% of the original exchange fee. Additionally, extended use fees may also apply if the unit is not received within the allotted return window (see above).

## **OPEN BAG POLICY**

An Open Bag Policy applies to units listed with an asterisk (\*) on the price sheets in this catalog.

If these units are removed from the ESD bag they are received in, exchange fees shall apply. If the package is unopened and the exchange unit is returned with original 8130 tags, part will follow the UNUSED EXCHANGE RETURNS policy described above.

## **UNACCEPTABLE CORES/DAMAGED UNITS**

Collins Aerospace Avionics reserves the right to refuse a core that has been damaged by contamination or corrosion, lightning, fire, submersion, crash, misapplication, inappropriate repair actions, improper packing, or abnormal wear.

If Collins agrees to accept a damaged core, Collins Aerospace Avionics shall invoice the Customer for the repair of said core. Billable damage examples include, but are not limited to: contamination or corrosion, cracked glass, broken faceplates and connectors, and/or physical damage caused by improper packing, improper installation, and/or incorrect aircraft wiring. Collins Aerospace Avionics reserves the right to void part warranty based on the extent of the damage. Damage estimates and pictures of units will be provided. The damage estimate should be approved by the customer within one week of notification. If the damage estimate is not approved within six weeks of the first notification, units will be repaired and the customer invoiced.

Collins Aerospace Avionics will not accept units that have been involved in an aircraft accident, incident, or subject to severe stress such as fire or fluid ingress. Customers who return cores that have been subjected to such conditions will have such cores returned to them unrepaired or scrapped by Collins Aerospace Avionics with customer approval.

Other unacceptable cores include a unit with a different part number than the unit shipped by Collins Aerospace Avionics (unless prior approval has been obtained from the Rental-Exchange Pool) or a core for a rental transaction that is a different serial number than the unit provided by Collins Aerospace Avionics. These cores may be accepted, at the sole discretion of Collins Aerospace Avionics; additional charges may apply.

## **PAPERWORK REPRINT REQUESTS**

Collins Aerospace Avionics reserves the right to charge \$100 USD for each reprint of the following documents:

- FAA 8130-3 reprint
- Packing list reprint
- Service memorandum/tear down report reprint

A purchase order will be requested.

## **EXPORT COMPLIANCE**

Collins Aerospace Avionics products that are designed for a military application are controlled by the International Traffic in Arms Regulations (ITAR) and will require an export license issued by the Department of State, Directorate of Defense Trade Controls for all export transactions. Approval of such licenses may take 30 to 120 days. Delivery of products requiring an export license is conditioned upon receipt of an approved license.

Collins Aerospace Avionics products that are designed for a commercial or dual-use application are controlled by the Export Administration Regulations (EAR) and may require an export license from the Department of Commerce, Bureau of Industry and Security. Approval of such licenses may take 30 to 120. Delivery of those products requiring an export license is conditioned upon receipt of an approved license.

Customer purchase orders must identify all parties to the transaction (i.e. foreign consignees and ultimate consignee/end user). Purchase orders placed with Collins Aerospace Avionics must also identify the end use platform to ensure compliance with Export Administration Regulation Part 744.21.

Due to restrictions on military end use and specific end users in China, Russia and Venezuela, shipments with an ultimate destination in any of these countries require specific end use/end user certificates from foreign consignees and end users located in these locales. When foreign consignees and end user are not known at the time of order placement (e.g. when purchasing for stock) the customer may be required to sign an end use certificate which must be returned to Collins Aerospace Avionics and be found acceptable to Collins Aerospace Avionics before any order can be processed.

In addition, Collins Aerospace Avionics is responsible for all export licensing with the Departments of State and Commerce and for all export documentation presented to US Customs. Should you (a Foreign Principle Party in Interest) have a US freight forwarder that you wish to be responsible for US Customs paperwork, a signed Power of Attorney or written authorization must be provided that identifies the freight forwarder and outlines responsibilities. An example of an acceptable written authorization follows:

### **Example of Written Authorization from FPPI to USPPI to File the EEI**

I, [INDIVIDUAL COMPLETING AUTHORIZATION], representing, [CUSTOMER NAME], the Foreign Principal Party in Interest ("FPPI") authorize [NAME OF DESIGNATED FREIGHT FORWARDER] to act as the Authorized Agent for export control, U.S. Customs & Border Protection, and Census Bureau purposes to transmit such export information electronically that may be required by law or regulation in connection with the exportation or transportation of any goods on behalf of said FPPI. The FPPI certifies that necessary and proper documentation to accurately transmit the information electronically is and will be provided to the said Authorized Agent. The Foreign Principal Party in Interest further understands that civil and criminal penalties may be imposed for making false or fraudulent statements or for the violation of any U.S. laws or regulations on exportation and agrees to be bound by all statements of said Authorized Agent based upon information or documentation provided by the FPPI to said Authorized Agent.

### **WARRANTY POLICY**

Collins Aerospace Avionics is pleased to offer a one-year warranty on all billable exchanges and exchange units converted to outright sale. The warranty period begins at the time of the outgoing shipment and entitles the holder to a no charge exchange replacement or a no charge repair, at the option of Collins Aerospace Avionics. This warranty is in accordance with Article 5 of Rockwell Collins General Conditions of Sale.

Repair or Exchange Warranty does not extend original equipment or aircraft warranty.

### **SERVICE CENTER REPAIR WARRANTY**

Service Center Repair Warranty does not include Rental/Exchange service as a remedy. Customers experiencing a failure of a repaired unit within the Service Center Warranty period should work directly with the service location for a solution.

However, if a billable rental was charged during the original repair period, rental during the service warranty repair shall be provided at no charge. Otherwise, any rental during a qualified warranty repair shall be billable.

## **SERVICES FOR SIMULATORS**

Rental service is offered to support units used on simulators, due to limited ability to certify units initially produced for simulator use.

Exchange requests may be reviewed on a case by case basis. The following information will be required for assessment:

1. Failed Part Number and Serial Number
2. Operator statement of confirmation that units were not altered from original configuration.
3. Confirmation that the operating environment of the unit does not exceed OEM specifications or FAA airworthiness requirements.

Induced damage or damage caused by excessive use will be quoted separately. Approval for additional charges may be required at time of order not to exceed 25% of the exchange order.

It is our intent to maintain the highest quality of equipment in our Exchange pools. Simulator core equipment will go through extensive testing, repair and overhaul inspection processes to ensure our quality standards are met. Any core equipment not able to meet these overhauls standards will be returned to the customer as an unacceptable core.

## **SERVICES FOR GOVERNMENT OR MILITARY CORPORATE/BUSINESS AIRCRAFT**

Collins Aerospace Avionics Rental and exchange services are available to certain government or military variants of corporate/business aircraft if the following conditions are met:

- Aircraft retains its commercial type certification
- Aircraft is operated in accordance with the civil aircraft flight manual
- Aircraft and installed equipment is maintained by FAA licensed mechanics(or other country equivalents)
- Aircraft and equipment maintenance is performed in FAA licensed facilities (or other country equivalents)
- PMA/TSO markings are mandatory for all equipment for core exchanges
- All equipment must be operated in accordance with the OEM operation/specification

If a government/military aircraft cannot meet the above criteria, repair support is available through one of our Service Centers or contact Collins Aerospace Avionics Government Systems office toll free at 1.800.321.2223 within the U.S.A., or 1.319.295.5100, or Fax at 1.319.295.4777.

## **OVERVIEW OF COLLINS AEROSPACE AVIONICS SERVICES**

Collins Aerospace Avionics is headquartered in Cedar Rapids, Iowa, U.S.A. with service capabilities that include total life-cycle service solutions for Maintenance, Repair & Overhaul (MRO) of Collins Aerospace Avionics and other OEM products for commercial, business, corporate and military operations. Additional supply chain management logistics capabilities include on-board services, provisioning, service parts sales, digital technical information services and asset management services. In addition, Collins Aerospace Avionics provides exchange, lease and rental of equipment.

Customers may access Collins Aerospace Avionics service information around the clock via [www.rockwellcollins.com/services\\_and\\_support.aspx](http://www.rockwellcollins.com/services_and_support.aspx) for access to: Global Asset Management, Maintenance and Repair, Service Parts, and Technical Information.

Collins Aerospace Avionics services include:

- Maintenance, Repair and Overhaul
- Field Service Engineering
- Integrated Logistics Support
- Rental Exchange

## **MAINTENANCE, REPAIR, AND OVERHAUL**

Collins Aerospace Avionics has long recognized the need to provide customers with superior after-sale support and has responded to that need with a worldwide service organization. Collins Aerospace Avionics service locations consist of international Service Centers and Bases, U.S. Centers and Bases, Quality Administration and Service Center Support - all committed to applying Lean Electronics for customer focused total life cycle value solutions.

## **SERVICE CENTERS**

Collins Aerospace Avionics Service Centers are strategically located throughout the world to provide maintenance on Collins Aerospace Avionics equipment both in and out of warranty. Overhaul and repair service can also be obtained at each location. As new products are introduced, service center capabilities are updated to support these products. Located within each Service Center is a dedicated Customer Service Representative, available to answer customer questions or problems.

Collins Aerospace Avionics Service Centers are all licensed or approved by the appropriate agency within the country they are located and for the countries they serve. Generally, all are Federal Aviation Administration (FAA) and/or Joint Aviation Authorities (JAA) licensed or approved. The Collins Aerospace Avionics Service Centers are AS9100 certified.

## **SERVICE AGENCY AGREEMENTS**

Collins Aerospace Avionics approved Service Agencies are:

Avionica S.P.A. ([www.avionica.aero](http://www.avionica.aero)) is the Collins Aerospace Avionics approved service agency for military and paramilitary repairs and services in Italy.

Tokyo Aircraft Instrument Co. ([www.tkk-air.co.jp](http://www.tkk-air.co.jp))

## **CUSTOMER SERVICE ENGINEERING**

Collins Aerospace Avionics Customer Service Engineers (CSE) are highly trained technical experts who are routinely involved in every phase of program development. Participation begins in design, continues through test and integration, and matures into post-delivery support. This depth of involvement ensures an unsurpassed level of proficient customer support.

Our field service staff is supported by program management, engineering and manufacturing leadership. In combination with our Customer Response Center, we offer a highly skilled, motivated and supported work force. The Field Service Engineering organization is experienced in both hardware and software dealing with all Collins Aerospace Avionics products from display systems, integrated avionics systems, communication systems and navigation systems, as well as new product development and testing.

## **INTEGRATED LOGISTICS SUPPORT**

Integrated Logistics Support (ILS) provides complete services and support throughout the life cycle of our products and systems. Working with you, our ILS team develops, plans, and integrates both short and long term support considerations into product design. In sustainment, we extend system and equipment useful life through proactive management of obsolescence focused on supply and repair chain health. This ensures you have a reliable support solution providing high survivability and sustained operational readiness with controlled ownership costs throughout the life cycle of your system and equipment.
