PULSE SECURE REMOTE ACCESS - Personal Devices

This website is used to access resources with a Windows-based computer system that is not a company owned asset such as your home computer. If you have a Mac or non-Windows computer, click here.

1. Open a web browser
2. Choose the link below that is closest to your location:
   - United States: https://vpn-us.ra.rockwellcollins.com
   - UK/London: https://vpn-uk.ra.rockwellcollins.com
   - Frankfurt: https://vpn-de.ra.rockwellcollins.com
   - Singapore: https://vpn-sg.ra.rockwellcollins.com
3. Copy and paste this link into the address bar:
4. Login to Pulse Remote Access.
   a. Enter your username and password.
   b. Choose your primary office (Non Company Asset) from the dropdown.
5. Click Sign In.
6. Follow the DUO prompts.

7. Enter your PC Number in the Terminal Sessions box and click Launch.
8. Choose Download to install the Pulse Secure Application Launcher (first time only).
   a. After first connection: Choose Open Pulse Secure Application Launcher.

9. After the launcher is downloaded, follow the on-screen instructions.
10. Select Always in the Setup box that appears.

11. Enter domain\username (see example screenshot for CCANET) and password.

12. Click OK to connect.
